-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-6 and 10-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is recited in claim 4 that the cover is "displaceable away" from the brewing chamber. There is recited no structure for providing such a function.

It is recited in claim 6 that the cover is "operatively connected" to the adjustment structure. There is recited no structure for providing such a connection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Seguenot et al.

There is disclosed in Seguenot a beverage making apparatus, comprising: a water supply structure T (col. 2, lines 40-45); a brewing arrangement 1 bounding a brewing chamber downstream of the water supply structure; a bounding member 5 in the brewing chamber; an adjustment structure 6 for adjusting the bounding member, the

adjustment structure including a resilient member 34 and a locking member 17; and a dispensing channel 26 downstream of the brewing chamber.

In regards to claims 7-9, it is the opinion of the examiner that the adjustment structure of Seguenot is capable of performing the function recited in the claims.

In regards to claim 4 the water supply structure includes a base which can be considered displaceable away from the brewing chamber when the brewing arrangement is removed from the supply structure. This allows access to the brewing chamber.

Allowable Subject Matter

Claims 5 and 10-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Cavalli, Gasser et al, Rolland and Kraan are cited for their disclosure of the state of the art.
